# Understanding In-Network Providers

It's important to understand the difference between in-network and out-of-network providers and how the In-Network Rate works to avoid unexpected charges.

#### **In-Network Rate**

Doctors and facilities contracted in your network — innetwork providers — have agreed not to charge more than PEHP's In-Network Rate for specific services. Your benefits are often described as a percentage of the In-Network Rate. With in-network providers, you pay a predictable amount of the bill: the remaining percentage of the In-Network Rate. For example, if PEHP pays your benefit at 80% of In-Network Rate, your portion of the bill generally won't exceed 20% of the In-Network Rate.

#### **Balance Billing**

It's a different story with out-of-network providers. They may charge more than the In-Network Rate unless they have an agreement with you not to. These doctors and facilities, who aren't a part of your network, have no pricing agreement with PEHP. The portion of the benefit PEHP pays is based on what we would pay a n in-network provider. You'll be billed the full amount that the provider charges above the In-Network Rate. This is called "balance billing."

Understand that charges to you may be substantial if you see an out-of-network provider. Your plan generally pays a smaller percentage of the In-Network Rate, and you'll also be billed for any amount charged above the In-Network Rate.

# Negotiate a Price

**Don't get Balance Billed:** Although non-contracted providers are under no obligation to charge within the In-Network Rate, consider negotiating the price before you receive the service to avoid being balance billed.

The amount you pay for charges above the In-Network Rate won't apply to your deductible or out-of-pocket maximum.

#### **Consider Your Options**

Carefully choose your network based on the group of medical providers you prefer or are more likely to see. See the Medical Networks comparison in this book or go to www.pehp.org and log in to PEHP for Members to see which network includes your doctors.

Ask questions before you get medical care. Make sure every person and every facility involved is contracted in your network.

Although out-of-network providers are under no obligation to charge within the In-Network Rate, consider negotiating the price before you receive the service to avoid being balance billed.

#### CO-PAY

A specific amount you pay directly to a provider when you receive covered services. This can be either a fixed dollar amount or a percentage of the PEHP In-Network Rate.

#### **IN-NETWORK**

In-network benefits apply when you receive covered services from innetwork providers. You are responsible to pay the applicable copayment.

#### OUT-OF-NETWORK

If your plan allows the use of out-of-network providers, out-of-network benefits apply when you receive covered services. You are responsible to pay the applicable co-pay, plus the difference between the billed amount and PEHP's In-Network Rate.

#### **IN-NETWORK RATE**

The amount in-network providers have agreed to accept as payment in full. If you use an out-of-network provider, you will be responsible to pay your portion of the costs as well as the difference between what the provider bills and the In-Network Rate (balance billing). In this case, the allowed amount is based on our in-network rates for the same service.

For more definitions, please see the Master Policy.

The maximum dollar amount that you and/or your family pays each year for

covered medical services in the form

of copayments and coinsurance (and

plans might also have separate out-ofpocket maximums for mental health &

substance abuse and for specialty drug

deductibles for STAR plans). Some
